ISBN-10: 0516454587

ISBN-13: 978-0516454580

Product Dimensions: 0.2 x 8.5 x 8.8 inches

Shipping Weight: 4 ounces (View shipping rates and policies)

Average Customer Review: 4.4 out of 5 starsÂ Â See all reviewsÂ (8 customer reviews)

Best Sellers Rank: #64,167 in Books (See Top 100 in Books) #39 inÂ Books > Science & Math > Mathematics > Pure Mathematics > Logic #339 inÂ Books > Children's Books > Education & Reference > Math

Age Range: 5 - 8 years

Grade Level: Kindergarten - 3

Customer Reviews

This is a wonderful book to use to teach the concept of sorting (why objects are grouped together in a particular way). I've used this book with my second grade class and they really loved the simple, colorful photographs depicting everyday objects. My two and a half year old daughter also enjoys the simple, no-nonsense text used to explain this sometimes difficult math concept. Very engaging book!

Lots of colorful pictures, but difficult to explain sorting because you can't move the objects around on the pages. It would be easier if you had actual objects to sort. So, I would recommend using actual objects instead of this book.

Wonderful math book by Henry Pluckrose! I have searched for years to find relatable , understandable and colorful math books for my Kindergarten and preschool students. I have in

Henry Pluckrose's series for young children! Thank you to Mr. Pluckrose for writing/illustrating these and to for carrying them at affordable prices!

This book is a small teaching book about sorting in different ways. A child reading it by his/herself would need some direction as they are reading. Good for homeschool moms teaching their kids about sorting and for teachers in the classroom. It is a short book but covers sorting with colorful pictures.
