My 6 1/2 year old grandson begins first grade next week but is already a reader with a High Independent Reading Level. His K teacher gave him independent summer work to keep his skill level high, and today he moved into the "Extra" work following the original four weeks of summer work she provided. One of his teacher's extra items was to identify an animal he wanted to learn more about, then go to the library to find a book about that animal. He wanted to learn about Grizzly Bears. Going to the library wasn't practical today, so I checked and found this book which I instantly downloaded to my Kindle. It wasn't in color, but the pictures came through very nicely in black and white. And he read the entire book out loud to me, stumbling only on a couple words like "national" and "pioneers". We learned Grizzlies can't climb trees, that the mothers usually have two cubs (sometimes more), and that they eat roots as well as berries and nuts and fish. He knows they are in Canada and Alaska, with a few in the northeast United State. I was very impressed with the facts presented, with the thoroughness of the research, and with the format of the book. I highly recommend this book for interested children. Best \$2.99 I've spent on him. Ever. Only problem was I couldn't get the link to work that offered weekly free books for children.
