Customer Reviews

Excellent book highlighting both dangerous creatures (including photos) as well as a couple of pages on stranger manners in which people have died. Have to say I'm a bit more creeped out going into the sea knowing it's not a shark I should be wary of but a 4 inch cone snail with toxin deadly enough to kill you dead in five minutes of which no known anti-venom exists! Had ready info I passed on to my boss regarding her upcoming visit to Africa pertaining to the tsetse fly which bite is responsible for over 350,000 human deaths per year, second only to the mosquito (Keep yourself drenched in that bug spray!) I highly recommend this one!

Wow! A non-fiction book that is definitely a page-turner. Nature/animal author Jordyn Madison has created another winner. This is a book that you will not be able to put down, once you look at the first page. Some of these animals seem to have jumped off the pages of a horror movie script, and yet they are real and live among us. Some of the symptoms the victims experience are unbelievably gruesome. I had no idea that some of these animals that appear docile are really that aggressive and dangerous. There is also a bonus section listing some of the unusual ways that people die that have nothing to do with animals. This is a book that everyone will be fascinated by. I will definitely be reading it with my young nephew. I think it's the kind of book he will want to read many times. The pictures are awesome. Highly recommended.

I bought this book for my nephew who is staying with my husband and I for a few weeks this summer. He loved it! The book is loaded with information and pictures and he hasn't put it down all week. I think he has looked through it at least 15 times just in the last day. There was enough an abundance of information in there that I didn't know about some of the deadliest creatures! Definitely recommend this book for young kids, especially boys, because it's loaded with information

All About the World's Deadliest Creatures is an entertaining and informative guide that just might creep you out! My kids loved the pics and I liked the fact the information was easy to understand and interesting, not just regurgitated crap you find in many books! You should grab this book and give it a read. Nice job!

Great book, highly recommend it. I read with so much interest - every page a winner with some amazing facts. Even the Cassowary here in Australia was mentioned. I gorgeous bird, who is very much under threat, but yes can do damage to you with its claws. Well done to the author!
